Marilyn Color-Wildemuth

After looking over your recent request for a review of the use of Iron Grit at your Seattle facility, the Puget Sound Clean Air Agency has determined that this installation as described does not require Notice of Construction approval as allowed by Section 6.03(b)(10) of Regulation I, which exempts "Any source not otherwise exempt under Section 6.03(c) of this regulation that has been determined through review of a Notice of Construction application by the Control Officer not to warrant an Order of Approval because it has a de minimis impact on air quality and does not pose a threat to human health or the environment."

Please inform us of any future modifications or other installations because some changes or equipment may require a Notice of Construction approval or notification in compliance with Article 6 of Regulation I.

If you have any questions, call Fred Austin at (206) 689-4055 or me at (206) 689-4052.

Sincerely,

Steven M. Van Slyke, P.E.
Supervisory Engineer
